

Pinhole Solar Viewer DIY Guide

Materials Needed

- 2 pieces of cardboard or boxes
- Aluminum foil
- Needle or pin
- White paper
- Tape
- Long black tube (optional)
- Baader solar filter film (optional)

Instructions

1. Make a pinhole in the foil and mount it on one box end.
2. Place white paper inside the other box as the screen.
3. Align both facing the Sun, project image on paper.
4. Optional: Use a long tube for sharper projection.
